## ADP SMALL BUSINESS REPORT SHOWS 77,000 SMALL BUSINESS JOBS ADDED IN NOVEMBER

### *[Small Business Hiring Continues to Accelerate](#)*

ROSELAND, N.J. – Dec. 5, 2007 – Private employment among small businesses (U.S. companies with fewer than 50 employees) increased by 77,000 in November, according to the [ADP Small Business Report](#)<sup>SM</sup> released today. The *ADP Small Business Report* is based on data from the *ADP National Employment Report*<sup>SM</sup>, created by ADP® in partnership with Macroeconomic Advisers, LLC. In addition to providing monthly information on small business [employment trends](#), the *ADP Small Business Report* includes information about short-term movements in the goods-producing and service-providing industry sectors.

### Small Business Employment Highlights – November Report:

- Total small business employment: +77,000
- Goods-producing sector: +2,000
- Service-providing sector: +75,000

#### **Notice:**

The release date for the upcoming December *ADP Small Business Report* has been changed from Wednesday, January 2, 2008 to Thursday, January 3, 2008. For the complete 2008 release schedule, please visit <http://www.smallbusiness.adp.com/smallbusinessreport/releases.asp>.

“Private employment among small businesses grew 77,000 from October to November of 2007, according to the *ADP Small Business Report*,” said Joel Prakken, Chairman of Macroeconomic Advisers, LLC. Prakken added, “This month’s *ADP Small Business Report* suggests small businesses continued to hire at an increasing rate. The three-month average change in employment for September through November was 65,000, up from 41,000 during the three-month period from July through September.”

Prakken added, “This month, the growth of employment among small businesses occurred against a backdrop of strong growth in employment among businesses of all sizes. The 77,000 jobs added at small businesses accounted for less than half of the

increase to total nonfarm private employment of 189,000. This proportion contrasts with the previous eleven months, when small businesses contributed the majority of employment gains. November's gains in employment at small businesses were virtually all in the service-providing sector of the economy, which showed an increase of 75,000, while the goods-producing sector increased just 2,000."

ADP Small Business Services provides payroll and business solutions for businesses with fewer than 50 employees. For more information on ADP Small Business Services, please visit: <http://www.smallbusiness.adp.com>.

### **About the *ADP Small Business Report***

The *ADP Small Business Report* is a monthly estimate of private nonfarm employment among companies in the United States with 1-49 employees. In partnership with Macroeconomic Advisers, LLC, the *ADP Small Business Report* is produced on a monthly basis by ADP® Small Business Services, a provider of payroll, tax management, human resources, professional employer organization (PEO) and administrative services outsourcing (ASO) solutions to small businesses across all industries. ADP Small Business Services is part of ADP Employer Services, a leader in outsourced payroll, HR and benefits administration solutions. The information included in the *ADP Small Business Report* is based on data from the *ADP National Employment Report*, a measure of employment derived from an anonymous subset of 500,000 U.S. business clients. During the first six months of 2007, this subset represented approximately 383,000 U.S. business clients and nearly 23 million U.S. employees working in all private industrial sectors. The data is collected for pay periods that can be interpolated to include the week of the 12<sup>th</sup> of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* and the *ADP Small Business Report* are not representative of changes in ADP's total base of U.S. business clients or ADP's total base of U.S. small business clients. The *ADP National Employment Report*, created by ADP® Employer Services, a division of Automatic Data Processing, Inc. (ADP), in partnership with Macroeconomic Advisers, LLC, is based on actual payroll data and measures the change in total nonfarm private employment each month.

For a description of the underlying data and the statistical properties of the series, please see “*ADP National Employment Report: Development Methodology*” at <http://ADPEmploymentreport.com/methodology.aspx>.
