ADP NATIONAL EMPLOYMENT REPORT SHOWS U.S. EMPLOYMENT DECREASED BY 532,000 PRIVATE SECTOR JOBS IN MAY

ROSELAND, N.J. – June 3, 2009 – According to today’s [ADP National Employment Report](#)[®], private sector employment decreased by 532,000 in May. The *ADP National Employment Report*, created by ADP[®] Employer Services, a division of [Automatic Data Processing, Inc. \(ADP\)](#), in partnership with [Macroeconomic Advisers, LLC](#), is derived from actual payroll data and measures the change in total nonfarm private employment each month.

Nonfarm Private Employment Highlights – May Report:

- Total employment: -532,000
- Small businesses* -209,000
- Medium businesses** -223,000
- Large businesses*** -100,000

- Goods-producing sector: -267,000
- Service-providing sector: -265,000

Addendum:

- Manufacturing industry: -149,000

* *Small businesses represent payrolls with 1-49 employees*

** *Medium businesses represent payrolls with 50-499 employees*

*** *Large businesses represent payrolls with more than 499 employees*

According to Joel Prakken, Chairman of Macroeconomic Advisers, LLC, “Nonfarm private employment decreased 532,000 from April to May 2009 on a seasonally adjusted basis, according to the *ADP National Employment Report*[®]. Monthly employment losses in April and May averaged 539,000. This is a notable improvement over the first three months of the year, when monthly losses averaged 691,000. Nevertheless, despite some recent indications that economic activity is stabilizing, employment, which usually trails overall economic activity, is likely to decline for at least several more months, although perhaps not as rapidly as during the last six months.”

Prakken added, “May’s *ADP Report* estimates nonfarm private employment in the service-providing sector fell by 265,000. Employment in the goods-producing sector

declined 267,000, with employment in the manufacturing sector dropping 149,000, its thirty-ninth consecutive monthly decline.”

“Large businesses, defined as those with 500 or more workers, saw employment decline by 100,000, while medium-size businesses with between 50 and 499 workers declined 223,000. Employment among small-size businesses, defined as those with fewer than 50 workers, declined 209,000,” said Prakken.

Prakken went on to say, “In May, construction employment dropped 108,000. This was its twenty-eighth consecutive monthly decline, and brings the total decline in construction jobs since the peak in January 2007 to 1,345,000. Employment in the financial services sector dropped 32,000, the eighteenth consecutive monthly decline.”

The matched sample used to develop the *ADP National Employment Report* was derived from ADP data which, during the last six months of 2008, averaged approximately 400,000 payrolls representing nearly 24 million U.S. employees. This approximately represents the size of the matched sample used this month.

Small Business Highlights – May Report:

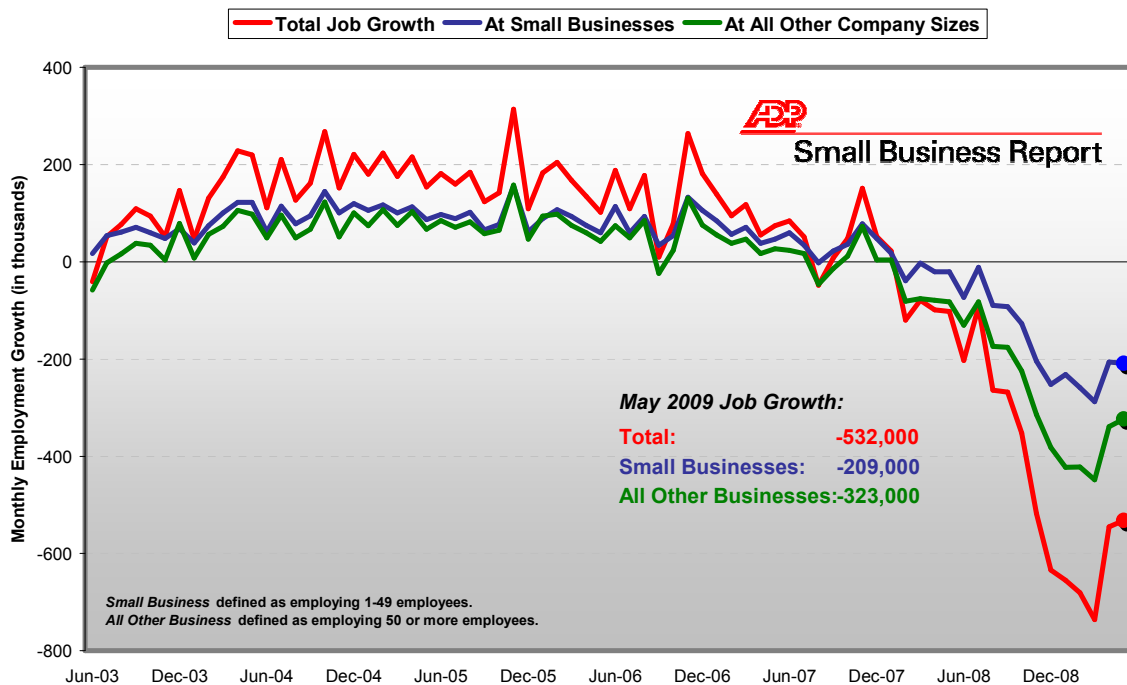

Due to the important contribution small businesses make to economic growth, employment data that is specific to businesses with fewer than 50 employees will be reported in the *ADP Small Business Report*[®] each month. The *ADP Small Business Report* is a subset of the *ADP National Employment Report*.

- Total small business employment: -209,000
- Goods-producing sector: -98,000 small business jobs
- Service-providing sector: -111,000 small business jobs

Private employment among [small businesses](#) decreased by 209,000 in May, according to the *ADP Small Business Report* released today. Additional information about small business employment, including charts on monthly job growth and employment levels, along with historical data, is available at <http://www.smallbusinessreport.adp.com>.

“Employment among small-size businesses, defined as those with fewer than 50 workers, declined 209,000 in May. Though job losses during May and April were slightly less than those seen earlier in 2009, employment is likely to continue to decline for at least several more months. Since reaching peak employment in January 2008, small-size businesses have shed 2,125,000 jobs,” said Joel Prakken.

About the *ADP National Employment Report*[®]

The *ADP National Employment Report*, sponsored by ADP[®], was developed and is maintained by Macroeconomic Advisers, LLC. It is a measure of employment derived from an anonymous subset of roughly 500,000 U.S. business clients. During the last six months of 2008, this subset represented approximately 400,000 U.S. business clients and nearly 24 million U.S. employees working in all private industrial sectors. The *ADP Small Business Report*[®] is a monthly estimate of private nonfarm employment among companies in the United States with 1-49 employees and is a subset of the *ADP National Employment Report*. The data for both reports is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical properties of the series, please see "*ADP National Employment Report: Development Methodology*" at <http://ADPemploymentreport.com/methodology.aspx>.
